

Avery Dennison®

High performance DOL 1400 Series

Shine, protect, preserve.

Excellent performance for outstanding printed designs. Our range of premium high-performance overlaminates offers superior conformability and offers the highest degree of protection against harsh climate conditions.

6 years vertical and 3 years horizontal when used in combination with Avery Dennison MPI 1105 EARS. All these materials are designed to meet customer's expectations for the most challenging wrapping jobs.

The DOL 1460 Max offers the best in class performance, offering 8 years vertical and 4 years horizontal durability and pairs this with a glossy finish that makes your graphics shine. Our highly rated DOL 1400 Z Series come in gloss, matt and lustre, and offer optimal transparency, outstanding elongation properties and high printed durability:

FEATURES AND BENEFITS

- Extensive elongation, making overlaminates extremely conformable
- Excellent clarity and color
- High performance DOL 1400 Z series offers gloss, matt and lustre finishes
- Long term durability (up to 6 years vertical and 3 years horizontal)
- Improved UV resistance for the DOL 1460 Max (up to 8 years vertical and 4 years horizontal)
- Synthetic liner offers a high gloss finish on the DOL 1460 Max
- Excellent protection against scratches, aging and weathering

RECOMMENDED USES

- All applications requiring high quality finishing and long term durability
- Overlamine protection for Digital Cast Series films
- Partial or full vehicle wraps on private vehicles and commercial fleets
- Interior & exterior 3D applications
